

The San Angelo Press,

Published Every Friday
S. C. PARSONS
SMITH & PARSONS
SAN ANGELO, TEX. Dec. 6, 1901.
Subscription, per year, \$1.50

The San Angelo Press aims to be in harmony with the reading people of the great territory of Southwest Texas and a live local newspaper of the best section of the country. Its columns are devoted to stock growers, breeders and farmers, news, improved methods, home, industrial and useful information.

San Angelo is a prosperous little city of 5,000 population, very nearly 500 feet above the sea level, which makes it an ideal place for the invalid, as the warm, dry atmosphere is not too rare for those suffering with any cough or lung affection. While it also rapidly cures the rheumatism or those with systems loaded with malacia.

It is an ideal health resort, furnished by nature, at the forks of the North and South Concho rivers, two streams of pure spring water.

The land of Tom Green county and the great Concho country is unsurpassed for fertility, yielding cotton, corn, oats, wheat, rye, barley, and all sorts of fruits and vegetables grow in abundance.

If you want any special information regarding lands, cattle, climate, health or location The Press will gladly aid you if it can. Simply enclose two cent stamps for postage and stationery, and address The Editor.

Austin Spencer, the Land Agent, will be pleased to answer any question by correspondence, will sell or trade, and should you conclude to visit San Angelo kindly call and let me show you the country.

AUSTIN SPENCER,
The Land Agent.

Live Stock Convention.

Chicago, Ill., Dec. 2.—The program of the convention is completed, and the highest authorities in the live stock world will take part. Secretary Wilson, of the department of agriculture, will positively be present and make an address upon the value of live stock to the farmer. Chief Statistician Powers, of the census office, will be present to tell the stockmen for the first time the net results of the census on live stock, which was taken last year under the auspices of the National Live Stock association, and a classified form. This will be the first announcement of the total figures and will provide the stockmen with a basis from which to figure upon the visible supply of live stock in the country.

The land question will come up, and it is likely that some decisive action will be taken regarding the public lands. Just what action will be taken cannot be foreshadowed at this time, but the stockmen feel that they are big enough to deal with it, and the attention of congress will doubtless be called to the subject in some manner.

A Head

that throbs, pains and aches, or feels heavy, stuffy, dull or dizzy, is a poor head to do business with. It irritates the temper, upsets the stomach, interferes with digestion and wears out the brain and nerves. Make the nerves strong, the brain clear and your head will be right.

"I suffered a great deal from excessive nervousness and head trouble. Would have done anything to get it, but have fallen on the street unconscious. After trying many remedies I was completely cured by Dr. Miles' Nervine."

E. D. WELLS,
95 Brinkerhoff Ave., Utica, N. Y.

Dr. Miles' Nervine

quiets the irritation, stimulates digestion and builds up nervous health and strength. Try a bottle.

Sold by druggists on guarantee.
Dr. Miles Medical Co., Elkhart, Ind.

The proposition to ask congress to pass a law that will prevent the people of this country from being imposed upon by wool manufacturers will attract the attention of all classes of people. This is the most important question ever brought before the association, and simply means that when people pay money for all-wool garments in the future, they will know that they are buying wool; not shoddy and cotton, as at present. Of course, the wool manufacturers will fight the proposition, but the stockmen and the people generally will be solid for it.

The question of irrigation as it relates to the public lands of the West will be discussed by the ablest men in this country, men who have made almost a life study of the question. The drought of the past season and its effects, the cattle situation and the sheep outlook, will all come in for consideration. Chief Forester Pinchot, of the department of agriculture, will propose a new plan for setting the question of grazing on the forest reserves. Chief Botanist Coville, of the department, will give pointers about poisonous plants on the range. Dr. Salmon, chief of the bureau of animal industry will bring the question of interstate inspection of live stock, and the agricultural colleges and experiment stations of a number of the states will be represented in the discussions.

SAV LEATH NEAR.

"It often made my heart ache," writes L. C. Overstreet, of Egin, Tenn. "to hear my wife cough until it seemed her weak and sore lungs would collapse. Good doctors said she was so far gone with consumption that no medicine or earthly help could save her, but a friend recommended Dr. King's New Discovery and persistent use of this excellent medicine saved her life." It's absolutely guaranteed for Coughs, Colds, Bronchitis, Asthma and all Throat and Lung diseases. 50c and \$1 at J. W. Harris & Co. Trial bottles free.

The Best Time

The best time to cure a cough or cold is when you are first affected. A pleasant and sure remedy for sore throat, weak lungs, bronchial soreness, coughing spells, etc., is Mexican Syrup for coughs and consumption. Be wise in time and keep a bottle in your medicine chest, always handy for immediate use, remembering the old adage, "a stitch in time saves nine." It is a true lung tonic and sells for 25 cents.

From London Answers.

"Look here," said a Suffolk farmer to a friend. "I'm going to kill my pig, but I owe some pork to my neighbors that I shall have none left for myself if I pay it all back. What would you do?"

"Quite easy to trick 'em," said the friend. "Kill your pig, and leave it hanging outside until late at night, so's every one can see it. Then take it in, and say some one stole it. Stick to the tale, and you'll be all right."

The farmer followed instructions and the kind friend watched his chance and stole the pig. The poor farmer came round next morning to tell what had happened.

"Somebody has stolen my pig!" he cried.

"Good!" said the friend. "Stick to it, and the neighbors'll believe you sure enough."

"But it was stolen, I tell you."

"Excellent," quoth the friend. "Just you stick to that tale."

"You confounded ass!" yelled the farmer, "don't you understand? It was really stolen."

"Superb," laughed the delighted friend. "You ought to have been an actor, so you ought."

That Suffolk farmer slammed the door and went away fuming.

An attractive woman thrives on good food and sunshine, with plenty of exercise in the open air. Her form glows with health and her face blooms with its beauty. When troubled with a costive habit, she takes a few doses of Herbine to cleanse her system of all impurities. Price, 50 cents. For sale by J. W. Harris & Co.

Many Wonder.

Many wonder how it is that pin worms and stomach worms get into little children, or how a tape worm 300 feet long, can get in and exist and grow inside of a man, as it sometimes happens. They may wonder, for it is a great mystery. However, many now know from experience that Mother's Worm Syrup will rid one of intestinal worms and greatly improve the health after the worms have been destroyed and expelled. It is absolutely a harmless remedy to take, and as it only costs 25 cents, all should try it who suspect worms to be the cause of their ill health.

Iron in Gonzales County.

Gonzales, Texas, November 26.—S. Z. Henderson of Harwood was in Gonzales yesterday talking iron ore to some of the business men. About two miles west of Harwood on the Southern Pacific railroad, and along the line of Gonzales and Caldwell counties is a range of hills called the "Iron mountains." There is any amount of rock on and beneath the ground that has always been considered of some value, but nothing had ever been done to ascertain its true worth until lately. Some of the parties who own the land got William B. Phillips, director of the mineral department of the Texas university, to visit the place and secure several specimens of the rock for examination. Mr. Phillips has written these parties, giving the following assay of the iron ore:

Per cent.
Metallic iron.....49.19
Silica.....18.50
Alumina.....4.31
Lime......22
Sulphur......22
Phosphorus......88
He writes also: "This ore is suitable for the manufacture of foundry iron. The contents of metallic iron is above the average for this class of ore."

The question of fuel has been discussed in connection with working the ore, and it is known that there are good indications of oil in the same locality, as well as an abundance of timber. A shaft has been sunk eighty feet deep in the top of the highest hill and iron ore found all the way down. About thirty five years ago a small silver mine was worked about four miles from there, but the output did not pay for the work at that time.

Cheap lamps at Auction House.

FOOD CHANGED TO POISON.

Putrefying food in the intestines produces effects like those of arsenic, but Dr. King's New Life Pills expel the poisons from clogged bowels, gently, easily but surely, curing Constipation, Bilioussness, Sick Headache, Fevers, all Liver, Kidney and Bowel troubles. Only 25c at J. W. Harris & Co.

The Whole Body.

The whole body depends on good, healthy blood for its sustenance and strength. Nothing makes the blood so healthy and the nerves so strong as Gooch's Sarsaparilla. Read Testimonials on its wrapper.

Pile the Cures Piles!

Money refunded if it ever fails. Anti-Aguc cures Chills and Fever.

To Mothers of Large Families

In this workaday world few women are so placed that physical exertion is not constantly demanded of them in their daily life.

We make a special appeal to mothers of large families whose work is never done, and many of whom suffer, and suffer for lack of intelligent aid.

To women, young or old, rich or poor, we extend an invitation to accept free advice. Oh, women! do not let

Mrs. Carrie Belleville.

your lives be sacrificed when a word of advice at the first approach of weakness, may fill your future years with healthy joy. Address a letter to Mrs. Pinkham's Laboratory, Lynn, Mass., and you will not be disappointed.

"When I began to take Lydia E. Pinkham's Vegetable Compound I was not able to do my housework. I suffered terribly at time of menstruation. Several doctors told me they could do nothing for me. Thanks to the Pinkham advice and medicine I am now well, and can do the work for eight in the family."

"I would recommend Lydia E. Pinkham's Vegetable Compound to all mothers with large families."—Mrs. Carrie Belleville, Ludington, Mich.

Securities, thought to be practically worthless at the time John A. Hinz was arrested on a charge of embezzlement of funds of the endowment rank of the Knights of Pythias, proved to be of considerable value. Texas lands that were owned by the order have increased in value on account of the oil strike in the State. This rise in value and other similar favorable discoveries have decreased the \$500,000 deficiency to about half of that amount.

Worms take refuge in the small intestine, where they can easily multiply. White's Cream Vermifuge will destroy these parasites. The verdict of the people tells plainly how well it has succeeded. Price, 25 cents. For sale by J. W. Harris & Co.

Austin, Tex., Nov. 29.—The San Antonio Brewing Association of San Antonio today confessed judgment in the District Court of having violated the Texas anti-trust laws and, according to the agreement effected a few days ago between the State and breweries which were sued, paid penalties aggregating \$7,500 to the State, this being the amount agreed upon for the domestic breweries. Immediately after paying the fine its representative filed a new charter, reorganizing the concern with the same name, etc., and with a capital stock of \$1,000,000. The incorporators are: Otto Koehler, Otto Wahrmond, John J. Stevens and S. G. Newton of San Antonio and Oscar Bergstrom of New York. These are the same as in the old concern. As far as the law is concerned the old corporation was completely dissolved.

A WOMAN'S AWFUL PERIL.

"There is only one chance to save your life and that is through an operation" were the startling words heard by Mrs. I. B. Hunt of Lime Ridge, Ws., from her doctor after he had vainly tried to cure her of a frightful case of stomach trouble and yellow jaundice. Gall stones had formed and she constantly grew worse. Then she began to use Electric Bitters which wholly cured her. It's a wonderful Stomach, Liver and Kidney remedy. Cures Dyspepsia, Loss of Appetite, Try it. Only 50c. Guaranteed. For sale by J. W. Harris & Co.

To Select a Site.

Austin, Tex., Nov. 25.—Hon. Jefferson Johnson, State Commissioner of Agriculture, left today for Smith and Henderson counties, where he will meet Dr. Oliver of Doughlasville and Frank Reichart of Houston, the other two members of the committee appointed by the board of directors of the Agricultural and Mechanical College to select the site for the proposed agricultural experiment station.

This station will be located either in Smith or Henderson counties and the committee will visit Troupe and Ludale, both in Smith county, and Athens, in Henderson county, the three points which are contesting for the station. After viewing the lands in the vicinity of these respective places and learning what inducements the people have to offer for securing the station, the selection will be determined upon.

Disease and danger lurks in the vital organs. The blood becomes vitiated and the general health is undermined whenever the stomach and liver fail to perform their functions as nature intended. Herbine will tone up the stomach, regulate the liver, where other preparations only relieve. Price, 50 cents. For sale by J. W. Harris & Co.

Wheat fed to Stock.

For some time past the Modern Millor has been the recipient of numerous requests from its readers, both those of this country and of Europe, especially the latter, regarding the question of wheat feeding to animals in the winter wheat feeding belt of the United States. To meet this request the Modern Millor has made a thorough investigation of this important subject by getting estimates from numerous trustworthy persons in the various sections of all the states where wheat has been fed to stock. By averaging up the returns of hundreds of these correspondents, and allowing for the advantages some men possessed over others for arriving at accurate estimates, a full and reliable statement can be submitted, covering every important winter wheat raising state and territory.

The returns from eight states and one territory indicate the total amount of wheat that will be fed during the present crop year will be 45,000,000 bushels, with a possibility that it may reach 50,000,000 bushels. During the season of 1894-5, the amount of wheat fed, according to the department of agriculture, was 75,000,000 bushels.

The feeding of wheat that season, it was generally claimed, was by no means a success from the feeders' standpoint. It was then asserted and is now frequently stated, that wheat, as food for animals, is a very poor substitute for corn; in fact, some say it is injurious to cattle. Numerous feeders say that corn at the same price as wheat, is by far the cheaper grain.—Modern Miller.
